Monthly Update

M-Split Corp is an Investment Corporation designed to pay monthly cash dividends. The Corporation invests in common shares of Manulife Financial, a leading Canadian based Global Financial Services company offering financial products and wealth management services. Three types of shares are available, a Capital share, a Class I Preferred and a Class II Preferred.

Capital Share (XMF.A)

The Capital Shares participate in any net asset value growth over \$10 per unit. These shares are highly leveraged to any change in the value of the Manulife common shares. In addition, dividends would be paid if and when the net asset value exceeds \$15.00.

Class I Preferred Share (XMF.PR.B)

Class I Preferred Shares receive cumulative monthly dividends to yield 7.5% of its \$5 par value. These shares have excellent asset coverage and their dividends are funded by dividends received on the underlying portfolio and income generated from the covered call writing program.

Class II Preferred Share (YCM.PR.C)

The Class II Preferred Shares have a par value of \$5 and are entitled to the assets of the company above \$5 per unit to a maximum of \$5. In addition, the Class II Preferred Shares are entitled to receive dividends at a rate of 7.5% once the net asset value of the company exceeds \$12.50.

Note: On March 23, 2010 a Capital Reorganization of M Split was completed. For complete details, please [click here](#) to view the Information Circular dated December 23, 2009.

Commentary

The North American financial markets displayed incredible resilience given the number of geopolitical concerns that have come into play so far this year. There are many geopolitical concerns to monitor but the market has continued on a path to global economic recovery becoming more firmly entrenched. The performance of the DOW and NASDAQ has proven April to be the best month of the year to date.

The U.S. housing market and unemployment market continue to exert a drag on the U.S. economy. Other measures of economic activity including manufacturing activity and retail sales seemed to suggest that the economy continues to improve, albeit at a fairly modest pace. The question of whether this economic growth can become sustainable without the continued record levels of fiscal and monetary stimulus remains to be answered in the coming months and years.

The valuations of the companies in the portfolio generally remain at very reasonable levels when measured by price to earnings ratios and current dividend yields and this should continue to act as a major support at these current market prices. Many Canadian companies are reporting over the next month and most are expected to show continued signs of earnings improvement. The dividend income continues to be supplemented by income generated from the covered call writing program.

	One Month to Apr 29, 2011	Year to Date Apr 29, 2011
TSX	-1.21%	3.73%
S&P 500	2.85%	8.43%
DJII	3.98%	10.65%
NASDAQ	3.32%	8.32%
