

July 2010

Monthly Update

M-Split Corp is an Investment Corporation designed to pay monthly cash dividends. The Corporation invests in common shares of Manulife Financial, a leading Canadian based Global Financial Services company offering financial products and wealth management services. Three types of shares are available, a Capital share, a Class I Preferred and a Class II Preferred.

On March 23, 2010 a Capital Reorganization of M Split was completed.

Holders of Priority Equity Shares (Symbol: **XMF.PR.A**) received the following securities in exchange for each Priority Equity Share held: One \$5.00 Class I Preferred Share (Symbol: **XMF.PR.B**); One \$5.00 Class II Preferred Share (Symbol: **XMF.PR.C**); One 2011 Warrant (Symbol: **XMF.WT**); and One 2012 Warrant (Symbol: **XMF.WT.A**).

Since more Priority Equity Shares were tendered for retraction under the special retraction right than Class A Shares, the outstanding Class A Shares were consolidated. This was done to ensure there is an equal number of Capital Shares, Class I Preferred Shares and Class II Preferred Shares outstanding.

Holders of Class A Shares (Symbol: **XMF**) received 0.944808 of a Capital Share (Symbol: **XMF.A**) in exchange for each Class A Share held.

Commentary

North American financial markets experienced solid gains during July spurred on by generally stronger than expected Q2 earnings, an easing of the European sovereign debt crisis and progress in the containment of the Gulf oil spill. In particular, the results of the European bank stress tests which were released in June were generally received favorably and helped reverse the decline in the Euro which improved stability in world financial markets.

Despite these positive developments, the economy and stock markets seem to have reached a critical juncture as market participants are increasingly questioning the durability and robustness of the recovery as many of the government sponsored stimulus measures come to an end. High unemployment, continued housing weakness and ballooning deficits in the U.S continue to act as a significant headwind for a more robust economic recovery. The Canadian economy is clearly doing better than most other developed countries but will be adversely impacted if worldwide growth slows due to its dependence on resource exports.

Over the coming months, market participants will continue to carefully scrutinize every piece of economic data in order to try and ascertain the shape and durability of this economic recovery. As mentioned in previous commentaries, sustained economic growth will require a greater transition from government led growth to private economic growth.

The valuations of the companies in the portfolio generally remain at very reasonable levels when measured by price to earnings ratios and current dividend yields and this should act as a major support at these current market prices.
