RISK

The risks of investing in the Company remain as discussed in the Annual Information form dated February 21, 2008. In addition, Note 3 of the semi-annual financial statements ("Management of Risk") contains disclosure on specific types of risks related to the financial investments held by the Company.

RESULTS OF OPERATIONS

Overall financial markets continue to be adversely impacted by the confluence of record high commodity prices and the continuing credit related problems originating from the US sub prime lending market. These conditions have caused economic growth to slow considerably in both Canada and the United States while at the same time high commodity prices are beginning to lead to a marked increase in inflationary pressures. In particular, the dramatic increase in oil prices has become a large obstacle for economic recovery.

Through this difficult environment, all financial services stocks including the Company's core holding Manulife Financial Corporation were negatively impacted. The Company met its distribution objectives during the period, but the net asset value per unit declined to \$ 17.42 as at May 31, 2008. The dividend income in the portfolio continues to be supplemented by a limited covered call writing program which provides some additional income to the portfolio.

DISTRIBUTIONS

Class A Shares - Distributions

Class A shareholders are entitled to receive regular monthly cash dividends initially targeted to be \$0.05 per Class A Share to yield 6% per annum on the original issue price. Dividends paid during the period were made at the targeted rate for a total of \$0.30 per share.

Priority Equity Shares - Distributions

Priority Equity shareholders are entitled to receive regular monthly cash dividends in the amount of \$0.04375 per Priority Equity Share to yield 5.25% per annum on the original issue price. Dividends paid during the period were paid at the targeted rate for a total of \$0.2625 per share.

⁽¹⁾ Results for the period April 18, 2007 (inception) to November 30, 2007

⁽²⁾ This information is provided as at November 30 or May 31, as applicable

⁽³⁾ A separate base management expense ratio has been presented to reflect the normal operating expenses of the Company excluding the one time initial offering expenses and performance fees. Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of average net assets during the period

⁽⁴⁾ Share issue expenses, representing all Agents' fees and other offering expenses can be found in the attached annual financial statements

⁽⁵⁾ The Company's portfolio turnover rate indicates how actively the Company's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Company buying and selling all of the securities in its portfolio once in the course of the year. The Company employs a covered call writing strategy which can cause the portfolio turnover rate to be higher than conventional mutual funds. The higher the Company's portfolio turnover rate in a year, the greater the trading costs payable by the Company in the year and the greater chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Company

⁽⁶⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average net assets during the period.

PAST PERFORMANCE

The past performance of 1) the net asset value per unit (1 Priority Equity share and 1 Class A share); 2) the Priority Equity share on net asset value basis; and 3) the Class A share on a net asset value basis for the six month period ended May 31 and for each 12 month period ended November 30 since inception are presented in the bar charts below. Each bar in the chart reflects the change in percentage terms of how a Unit, a Priority Equity share or a Class A share would have increased or decreased during the applicable period. In respect to the charts displayed below, please note the following:

- The performance information shown assumes that all cash distributions made by the Company during the periods shown were reinvested in the applicable additional securities of the Company,
- The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance; and,
- Past performance of the Company does not necessarily indicate how it will perform in the future.

NOTES TO FINANCIAL STATEMENTS

FOR THE SIX MONTH PERIOD ENDED MAY 31, 2008 AND FOR THE PERIOD FROM
APRIL 18, 2007 TO MAY 31, 2007 (UNAUDITED)

2. Summary of significant accounting policies (continued)

National Instrument 81-106, section 14.2, issued by the Canadian Securities Administrators (“CSA”) in 2005, requires the net asset value of an investment fund to be calculated in accordance with Canadian GAAP. The CSA has granted relief to investment funds from complying on a temporary basis with Section 3855, for the purposes of calculating and reporting net asset value (other than for financial reporting purposes) until September 30, 2008, to permit further review of the impact this pronouncement has on the redemption price of an investment fund (“Transactional”). Depending on the outcome of this review, the method by which net asset value is calculated as governed by Section 3855 may result in a change to the Transactional NAV on such date. In accordance with the relief granted by the CSA, a reconciliation of the net asset value calculated in accordance with Section 3855 of an investment fund (GAAP NAV) is required to be disclosed. The Company has applied this change on a prospective basis. The reconciliation of the Company’s Transactional NAV (ie. based on last traded price of portfolio securities) and the GAAP NAV (ie. based on last bid price of portfolio securities) is presented in the following table:

	GAAP NAV	Difference	Transactional NAV
May 31, 2008	\$81,961,284	-	\$81,961,284

	GAAP NAV per unit	Difference	Transactional NAV per unit
May 31, 2008	\$17.42	-	\$17.42

Investment transactions and income recognition

- Investment transactions are accounted for on the trade date.
- Realized gains and losses on investment sales and unrealized appreciation or depreciation in investment values are calculated on the average cost basis.
- Option fees paid or received are deferred and included in investments on the statements of financial position. Realized capital gains or losses are recognized in the statements of operations when options are exercised, expire or are closed out.
- Deferred gains and losses on options are recognized in investments and as a component of net unrealized appreciation (depreciation) in the value of investments.
- Dividend income is recognized on the ex-dividend date. Interest income is recognized when earned.
- Net realized gains and losses on investments include net realized gains or losses from foreign currency changes.

NOTES TO FINANCIAL STATEMENTS

FOR THE SIX MONTH PERIOD ENDED **MAY 31, 2008** AND FOR THE PERIOD FROM
APRIL 18, 2007 TO MAY 31, 2007 (UNAUDITED)

3. Management of Financial Risk

The Company's investment activities expose it to a variety of financial risks: market risk (including price risk, interest rate risk and currency risk), credit risk and liquidity risk.

Any sensitivity analysis presented below may differ from actual results and the difference could be material.

Market Price Risk

All securities investments present a risk of loss of capital.

The market price risk is affected by three main components: price movements, interest rate risk and foreign currency movements.

Price risk

It would be reasonable to expect that the Company's portfolio will exhibit market price movements that are reflective and generally highly correlated with the market price of Manulife common stock. The supplemental covered call writing program which generates an additional stream of income to the portfolio may also help mitigate against market price declines during periods in which the Portfolio company has a covered call option written against some or all of that position.

A 1% increase /decrease in the portfolio would currently increase/decrease net assets by \$816,322.

Interest rate risk

The majority of the Company's financial assets and liabilities are non interest bearing. As a result, the Company is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates and considers interest rate risk insignificant.

Currency risk

The portfolio holding and other net assets are denominated in Canadian dollars and therefore there is no currency risk.

NOTES TO FINANCIAL STATEMENTS

FOR THE SIX MONTH PERIOD ENDED MAY 31, 2008 AND FOR THE PERIOD FROM
APRIL 18, 2007 TO MAY 31, 2007 (UNAUDITED)

Other risks

Credit risks

Credit risk is defined as the risk that a counterparty will be unable to pay amounts in full when due. All of the Company's transactions are in listed securities and options and are settled and paid for using approved brokers. The risk of default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on purchase once the securities have been received by the broker.

Liquidity risk

The Company pays monthly dividends and is subject to redemption requests from time to time. The Company's portfolio is invested in Manulife common stock which is a highly liquid large capitalization stock that trades on the TSX. As such, any requirement to raise cash beyond the Company's normal operating level can easily be satisfied through the sales of its portfolio holding. The Company receives adequate notice for all redemption requests. The Company considers liquidity risk as low.

Concentration risk

The Company's only holding is concentrated in the common stock of Manulife and as such will be exposed to the specific factors that affect this stock. This holding could be as much as 100% of the net assets of the Company.

4. Priority Equity shares

The Company is authorized to issue an unlimited number of Priority Equity shares.
